SUMMARY

MCA graduate in Cyber Security. Cisco-certified in IT support. Hands-on with ticket handling, escalation, Windows and Linux basics, networking fundamentals, and troubleshooting. Clear communicator, open to shift-based roles.

KEY SKILLS

Technical Support: Hardware/software installation and troubleshooting, OS support (Windows, macOS/mobile basics), networking fundamentals, remote troubleshooting
Customer Support: Active listening, clear technical communication for non-technical users, patience under pressure, professional tone across phone/email/chat
Process & Documentation: Ticket logging and tracking, ticket prioritization, escalation procedures, following SOPs and security policy, clear case documentation
Networking: TCP/IP, DNS, HTTP/HTTPS, ports and cable identification, connectivity troubleshooting
Security Awareness: Data confidentiality, social engineering prevention, cybersecurity fundamentals
Data: SQL (queries, data handling)
Programming: Python (working knowledge, basics)
Productivity: Microsoft Excel, Power BI, Microsoft Office
Languages: English, Kannada, Hindi

CERTIFICATIONS

- IT Support Specialist Career Path — Cisco Networking Academy (Sep 2026), covering Hardware and Upgrade Support, Operating Systems Support, Security and Connectivity Support, and IT Customer Support Basics
- Introduction to Cybersecurity — Cisco Networking Academy (Jun 2024)
- Google Cloud Cybersecurity — Google Cloud Skills Boost (Feb 2025)
- Google Cybersecurity Professional Certificate — Coursera (Mar 2024)
- Aptitude & Soft Skills, Power BI, Advanced Excel, Career Preparation Program — Glisten Project Solution Pvt. Ltd. (Jun 2023)

PRACTICAL TRAINING

ServiceDesk Simulator — Online Helpdesk Practice

servicedesk-simulator.com

- Work through a queue of practice tickets: read the user's report, check priority and business impact, troubleshoot, and resolve or escalate.
- Learning the support levels and when a ticket should be passed to the next level up.

PROJECTS

Provenix — Cybersecurity Learning Platform

github.com/Yashyosss/Provenix

- Designed and built the full platform solo: Next.js, React and TypeScript front end, Django REST backend, and 30 interactive games, including an incident-response simulator and a log-analysis game.
- Secured it with JWT access and refresh tokens, rate limiting on all endpoints, input validation and role-based access, plus an admin panel and moderation tools for the community feed.
- Traced an answer-bias bug that affected 21 game files back to its root cause and fixed all of them with an automated patching script instead of editing each file by hand.

Steganography Tool

github.com/Yashyosss/Steganography-tool

- Built a desktop app in Python (Tkinter, Pillow) that hides text messages inside images and extracts them back out.
- Added message logging to keep a record of each operation, and support for multiple image formats.
- Designed a dark-mode, user-friendly interface; delivered as my MCA capstone project in secure application development.

EDUCATION

Master of Computer Applications (MCA) — Specialization in Cyber Security

Sep 2023 – Aug 2025

Jain (Deemed-to-be University), Bengaluru | CGPA: 8.52 / 10

Bachelor of Computer Applications (BCA)

Sep 2020 – Aug 2023

Seshadripuram Degree College, Mysore | CGPA: 8.11 / 10

CORE COMPETENCIES

Communication • Patience • Problem Solving • Attention to Detail • Adaptability • Professionalism • Quick Learning Ability
